

### Filter cloths made from textile fibres...

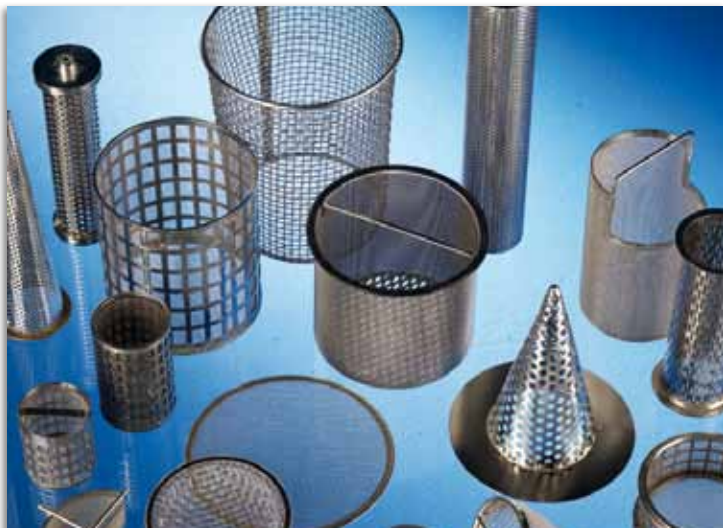

as **filter pockets and bags** as well as **filter hoses** made to measure from needle felts or textile cloths. Our filter hose service division will assist you with cleaning and repairs.

**Filter Media**

### Filter inserts made from metal or plastic...

as **form filters** for filtering, cleaning and regeneration. They prevent damages caused by impurities in liquids and gases and thus secure uninterrupted production processes.

### High precision filter tubes...

comprise triangular-shaped wrapped profiles, which are connected with the cross bars via resistant pressure welding to form a high-strength construction element with very precise gaps being maintained at the same time.

**Filter Media**

### Special filter elements...

for various applications such as beverage industry, water treatment/ resources management, power stations, mechanical engineering, chemical industry, and the like.

## A Reliable Partner.

**Sieves**

**Slotted Wedge Wire Sieves**

**Wire Mesh Conveyor Belts**

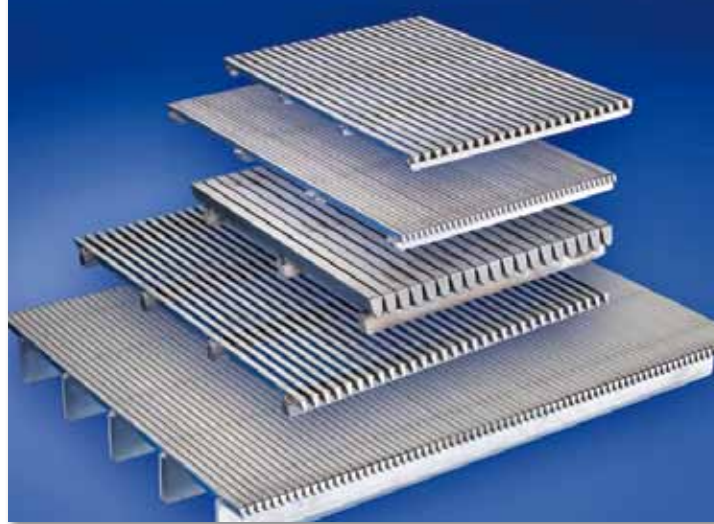

**Filter Media**

**STEINHAUS**

**Sieve panels**  
**of highly wear resistant polyurethane...**  
 in modular, tensioned or flat panel designs for the separation of bulk materials such as sand and gravel, hard rock, coal and ore, chemical products, foodstuffs and many other materials.

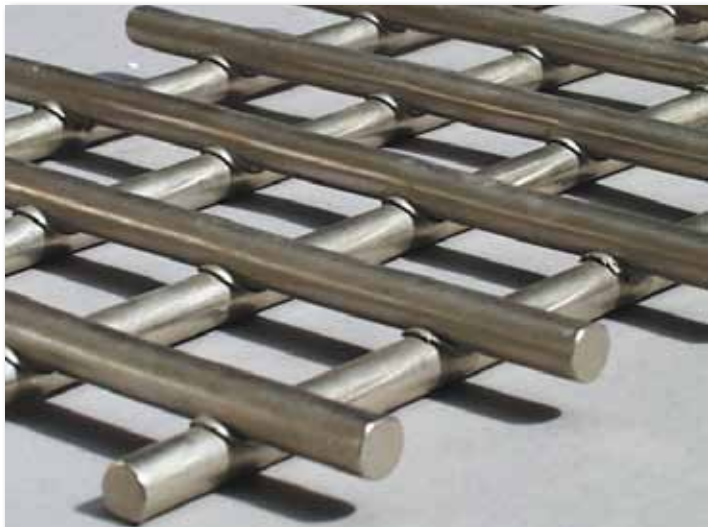

**Slotted sieves made of**  
**shaped profile wires and cross bars...**  
 looped execution. They are particularly suitable for dewatering, deslurrying and classifying.

**In various designs...**  
 made from corrosion and heat resistant wires and raw materials.

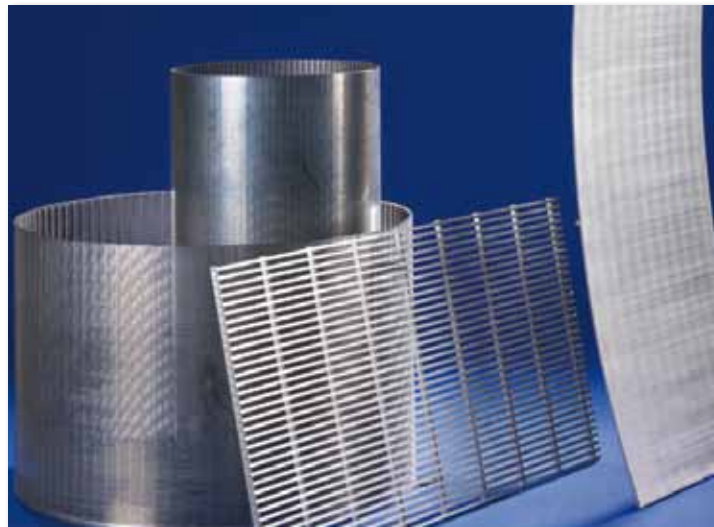

## Sieves

**Sieve panels of wear and**  
**corrosion resistant steel grades...**  
 as woven wire mesh, pressure welded grids or perforated plates for the separation of bulk materials such as sand and gravel, hard rock, coal and ore, chemical products, foodstuffs a. o.

## Slotted Wedge Wire Sieves

**...on screening machines and sieve bends,**  
**in centrifuges and dewatering troughs...**  
 as flat filters for extraction and diffusor floors, in kiln and germination racks, as well pipes and for many other purposes.

## Wire Mesh Conveyor Belts

**An economical solution**  
**for transporting mass products...**  
 particularly if they have to be treated at the same time, such as washing, spraying, drying, cooling, heating, sandblasting, paint spraying and many more.
